

## My Presentation Style

My talks are designed to be of interest to everyone whether they have a passion for aircraft or not. I use film footage, technology, music, humour and a genuine enthusiasm for my subject to provide a fascinating insight into the topics. Presentations are delivered in an energetic manner and I am always willing to take questions at the end. I have given presentations to numerous audiences ranging from school children, parent groups, professionals, enthusiast and older persons groups. I do not use jargon. My enthusiasm for the subject is often commented upon and my inclusive style ensures all will learn something. Being a qualified teacher I am able to empathise with my audience and adjust my presentation on-the-fly to ensure it is relevant and of interest to all. I often receive repeat bookings.

## Contact Details

[www.guyinthesky.co.uk](http://www.guyinthesky.co.uk)

**07960 44 94 94**

**mr.guy.bartlett@gmail.com**

To make a booking or to ask additional questions please contact me using the above details. Please only call after 6pm as I am at work before.

**If you wish to make a booking please ensure you provide the following information :**

**Name of Organisation and Contact Name**

**Address of Venue (inc postcode)**

**Which presentation you'd like**

**Required date and time of the presentation**

**Parking Arrangements**

I will travel anywhere in the Kent, Essex, London, East & West Sussex. I am based in Maidstone, Kent. I provide talks both in the daytime or evening.

My fees start from **£95** (plus travel expenses at 50p a mile of more than 25 miles from Maidstone). I bring souvenirs which can be purchased as mementos. Electronic lecture notes are available FOC on request.

Please note all my talks last a full hour and cannot be reduced as they contain no "filler" content.

I have my own AV equipment but request a projector screen or blank wall (wall preferred) and a small table.

# Guy In The Sky

Talks For Groups with  
*"The Aeroplane Man"*

**All talks updated for 2020**

*"Do what you do well  
so they will want to see it again and  
bring their friends."*

## Red Arrows Smoke On - Go!

Red Arrows pilots are amongst the most highly-skilled and experienced within the Royal Air Force. This presentation explores the history of RAF Aerobatics teams and includes a look at what goes into making the RAF Red Arrows the premier aerobatics team in the world.

My most popular presentation

## Concorde Supersonic Cover Up?

The fastest passenger aircraft of all time. First flown in 1969, this iconic vehicle was ahead of its time in so many ways. This presentation explore the history and technology of the aircraft. It also explores the Paris crash and offers new insight into the sequence of events on that fateful day.

One of my most popular presentations

## How The 747 Got Its Hump

The Boeing 747 is perhaps one of the most recognisable aircraft in service today. This presentation looks at the success of this versatile aircraft. Did you know 747's transported the Space Shuttle? Would you like to find out what unique features are built into Airforce One, the presidential aircraft of the United States? Then this is the talk for you!  
**A new talk for 2020.**

## History Makers Pioneers from Kent

Kent has been home to a number of genuine pioneers who broke the mould and, for better or for worse, wrote themselves into the history books. For them, fame was hard earned and a result of years of toil. This presentation takes a look at just a handful of the perhaps lesser-known Kentish folk who have a place in history. **A new talk due to go live in 2020.**

## Avro Vulcan The Delta Deterrent

Designed to drop a nuclear payload deep within Russia, this delta-winged aircraft together with the Victor and Valiant made up the UK V-Force. This presentation will explore all aspects of the aircraft including my role in the restoration of the last flying Vulcan. Do you know why every Vulcan carried a RAT? Or how the Vulcan was used to develop Concorde?

## The Space Race Who Really Won?

Many people agree that the space race ended on July 20, 1969, when Neil Armstrong stepped onto the moon for the first time. However, the story did not end there. This presentation looks at the achievements of both the Soviet Union and America and answers the question, Who Won The Space Race? It also looks at the new space race, one which is only just beginning!

## Stealth Aircraft State of the Art Warfare

Development of stealth technology began in Germany during WWII. This presentation will look at well-known examples of stealth aircraft including the F-117 Nighthawk, the B-2 Spirit, the F-22 Raptor and the F-35 Lightning II. Learn about the technologies used to create these state-of-art war machines. We also explore the future of Stealth Technology.

## Donald Campbell Record Breaker

Donald Campbell was obsessed by speed. He remains the only person to set both world land and water speed records in the same year (1964). Do you know who Mr Whoppit is? You will find out this, and much more about this unique and very British icon. The presentation includes documentary footage of Campbell speaking about his speed record attempts.

## Battle of Britain Victory Against the Odds

This presentation examines the aircraft, pilots and tactics used to ensure victory in the skies. It offers a unique insight into the RAF perspective of the Battle of Britain and how the outcome was almost very different. Re-live the iconic vision of Spitfires and Hurricanes battling to preserve our freedoms high above Southern England. A pivotal moment in WWII.

## 4 Minute Warning It Almost Happened

The 4-minute warning was a public alert system conceived by the British Government during the Cold War and operated between 1953 & 1992. This talk examines the nuclear threat, what would have happened should the alarm have sounded and its consequences.

**Note** : This talk may not be suitable for all due to the nature of the subject.

## The Dambusters The Impossible Mission

Operation "Chastise" has become a legend in military history as it contains all the traditionally admired military attributes of originality, surprise and heroism coupled with a dramatic outcome. It explores the roles of Guy Gibson and Barnes Wallis. Do you know the links this mission has with Herne Bay, or where you can still see the bouncing bombs?

## SAS Embassy Siege Standby Standby!

The SAS assault, codenamed "Operation Nimrod", was broadcast live on peak-time TV. Now discover the inside story of what lead up to the raid, how it almost went tragically wrong, and how it cemented the Special Air Services as one of the elite Special Forces.

**STOP PRESS!** For a small additional fee I can bring examples of SAS weapons and equipment.
